

COFFEE

TIME FOR A COFFEE?

There are few categories that can offer the margins that take-away coffee can do. Often, you only need to sell a few cups of coffee a day to calculate the investment. Like all other sales, it is influenced by how the product is presented and therefore we have compiled different types of furniture that solve the same need.

The ROBUSTA coffee module is our great selling fitting with unbeatable compactness. We have four different standard modules. With ROBUSTA you can offer both coffee with most accessories and, in particular, small-scale bakery goods.

The product selection ESPRESSO is a complete and thoughtful modular assortment, where you can build a whole coffee or fast food corner to suit your needs.

ROBUSTA

With this complete coffee module, you can sell one of the most powerful products in the service store - Coffee with bakery goods.

A compact coffee module available in 4 different widths. Place for bags, pliers, napkins, coffee mugs, caps, sugar sticks, mixing sticks, several kinds of teas and display cabinet for bakery goods.

The entire assortment is available in a selection of standard colors. In the brochure, for example, you can see the products in the dark melamine Amazonia, which with a white back creates a harmonious basis for presenting your goods in the best possible way.
